

## Quadramobile – Mechanical

**Montel is a world leader in the design and manufacture of mobile storage systems for all types of applications. The unique mechanical Quadramobile system allows one or more ranges to be moved easily and effortlessly with a crank handle. It is designed specifically for the office environment where maximum flexibility and versatility is needed.**

### Features and Benefits:

Unique, leveled modular deck & carriage system Installs over existing floor surface and does not attach to building structure (see brochure) -

- System can be reconfigured in all directions without modification to the original product, thus accommodating future needs and ever changing requirements
- System can be depreciated as furniture
- A landlord cannot claim the system as a part of the building structure

Shelving frame structure can be accessorized with a wide variety of shelves, drawers, racks and other components to accommodate current and future requirements

Full-length drive shaft on every carriage connected to large permanently sealed wheels -

- Eliminates possible distortion
- Reduces potential stress on the carriage structure
- Insures long, maintenance free service

Mechanical – Safety & Security Features -

- An aisle locking mechanism is provided for each carriage
- Optional key lock is available for security
