

MONTEL
The Intelligent Use of Space

**Storage Solutions
for Correctional
and Law Enforcement
Facilities**

**Multi-Usage High Density
Storage Systems**

An inherent problem in the correctional system is overcrowding. This situation inevitably leads to storage space congestion in all prison departments.

Montel can provide efficient solutions to your storage problems by maximizing existing space, while providing a highly secure environment for the items being stored.

- Evidence storage
- Armory
- Records and Files
- Pharmaceuticals
- Medical and Dental supplies
- Radiology (X-Rays)
- Bulk storage
- Linens and laundry
- Tools
- Library
- Personal effects

Save at least
50%
of your space
or
double
your storage
capacity

Advantages

Montel high density storage systems

- Contribute directly to the reduction of storage-related costs
- Create new space availability inside existing facilities
- Increase the overall efficiency of secure storage and records management

Montel solutions for various departments

Administration, Admission and Release Zone

Montel's systems provide excellent solutions for centralized records storage.

- Files and office supplies
- Inmate records
- Inmates' personal effects
- Guards' personal effects
- Evidence storage

Law Library

Law books and materials stored in a high-security system.

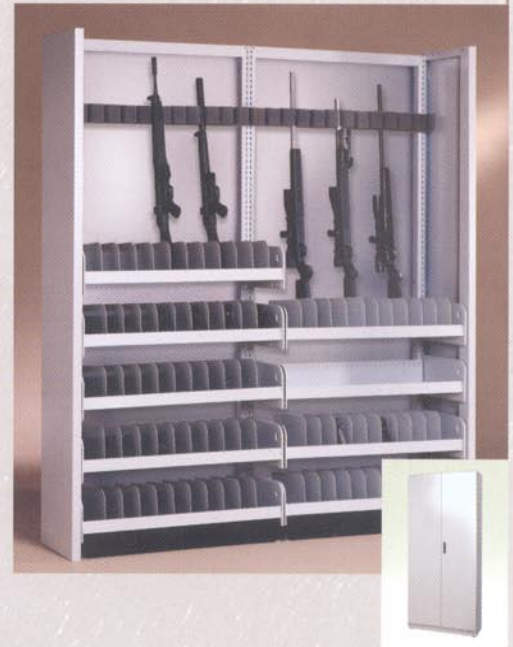

Armory

Ammunition and weapons storage.

Gun rack can be used on the mobile system

- Adjustable shelves and dividers
- Carpet and foam to protect the guns

Linens and laundry

Inmate bedding and other linens stored in Montel's system.

Medical and Dental Care Department

Montel offers systems specifically designed for Health and Dental Care departments.

Medical files and X-Rays

Sturdy shelves and full-height dividers combined with Montel's QuadraVista shelving and Mobilex carriages allow maximum use of storage space devoted to x-ray films.

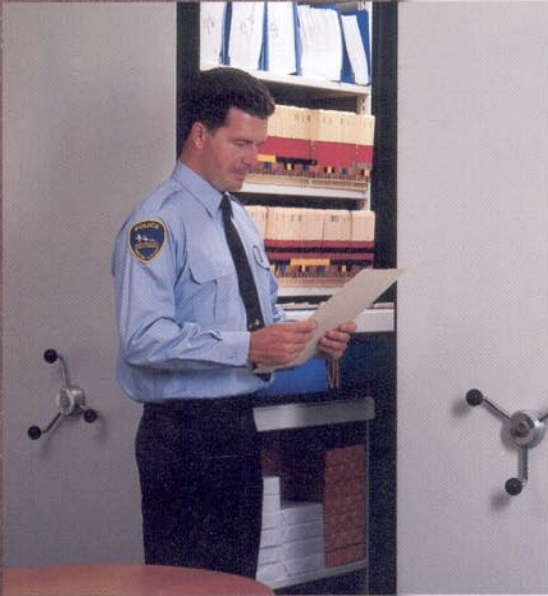

Medical, pharmaceutical, and dental supplies

Montel can store any type of material, from bulk items to specialized specimen containers, with a secured locking system.

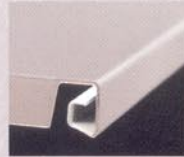

Security Features

- Security screw that locks all shelving components in place and prevents entry without the use of a special security screw bit
- Secured locking system

- Shelf edges have a fourth bend at the front and at the back eliminating sharp edges.

Quadral®
(lateral filing/storage system)

MixMedia Cabinet

Montel's mobile systems can be mechanically or electrically activated.

Electrical Control

- An electrically driven system - easily activated by a push button - eliminates the manual effort required with a crank handle
- The electrical and electronic controls insure a very safe operation
- An electrical override is built-in should facility power be lost
- Large selection of electrical safety features available
