

THE NATIONAL BASEBALL HALL OF FAME AND MUSEUM ADOPTS MONTEL'S STORAGE SOLUTIONS

Client: National Baseball Hall of Fame and Museum

Location: Cooperstown, NY, United States

Challenge: Pursuant to a rapid growth of baseball major league artefacts, the National Baseball Hall of Fame and Museum was confronted with a need for efficient storage solutions for its 30,000 to 35,000 collection objects.

Objective: The collection, which includes baseballs, bats, uniforms, player equipments and textiles, had to be efficiently stored now in a climate-controlled environment. In addition, the proposed new storage system had to support the collection growth (400 new objects yearly) over a 10-year period.

Solution: A custom-designed Mobilex mobile system was proposed in order to accommodate many different and flexible shelving and collection accessories.

Product Description: Montel designed the following products:

- Montel mechanical Mobilex high-density mobile storage systems;
- QuadraVista 4-Post shelving systems;
- Customized baseball bat racks adapted to the QuadraVista shelving system;
- Lateral art racks for less fragile collections that maximizes the floor space;
- 4D shelving with museum cabinets;
- Rolled textile storage.
